BS:218:FORGING BRASS Specification Sheet

DESCRIPTION

Forgings made from Copper based alloys offer a number of advantages over products made by other processes. Hot forgings are used in virtually every industry: pipe fittings, domestic faucets, radiator valves, gas appliances, window and door hardware being merely a few typical examples of the products which can be manufactured by this process.

VALUE ADDED SERVICES

AEPL manufactures and supplies Copper Alloys Extruded Bars to Domestic as well as International Markets. Our customer base has a key advantage since our Foundries, Laboratories, Extrusion Mill, Shell Mouldings and CNC Machine shop are all located on a single site, which eliminates waste and allows excellent quality control at each stage. Our ability to reclaim swarf and machined chips allows us to offer competitive pricing for the parts that we either extrude or cast.
